

Mold'On Postmold TransTip 888

TRANSTIP 888 BENEFITS

-  Application on Rotomolded Parts
 - With ambient temperature
 - 2 OR 3 Weeks after rotomolding parts
 - Several months after rotomolding parts
-  Application on **clean and smooth** surface
 - Oil, PE Powder and dirt free etc...
-  No flaming needed before application
-  Quick and simple self adhesive application
No long friction required for adhesion to PE
-  Application starting from 20°C (68°F) like any self adhesive system
-  Simple Flaming after application

Compared to post mold 877, our T888 has for advantage to be :

1. Easier and quick to apply
2. More flexible to apply in 2D
3. Better Flaming resistance
4. Stronger scratch and UV resistance after 1 week outside
5. Less subject to cracking during application
6. Better storage over time
7. Pantone, Ral, graphics colours are maintained even after flaming
8. Possible Bar code, QR Code, serial numbers readable even after flaming
